24) A number cube with sides labeled 1-6 is rolled two times, and the sum of the numbers that end face up is calculated. What is the probability that the sum of the numbers is 7.

Name: Algebra Keystone Exam Review

There is this problem in our Algebra 1 state exam, well it's in the sampler I'm not allowed to actually see the exam. Yesterday my Algebra 1B students took their assessment on writing linear equations, just the boring stuff no applications. So for XP points (read about those here) I gave them the bowl problem.
