Student investigations may involve a variety of skills ...

The skills at the top of the list are the easiest to master and can be introduced to young children through nature studies. Teach the more challenging skills by using successively more difficult experiments over time. While not all skills may be taught at once, a good science lesson will incorporate several of these skills.

Climate science research and crime scene investigations share interesting similarities. For example, climate scientists, like their forensic counterparts, use the latest technology to collect data. They must observe and record changes in variables (such as land and ocean temperatures, greenhouse gas concentrations, or glacial and sea ice mass) that affect Earth's climate.
