Any Heikin-Ashi strategy is a variation of the Japanese candlesticks and are very useful when used as an overall trading strategy in markets such as Forex. Unlike the regular Japanese candlesticks, heikin-ashi candlesticks do a great job of filtering out the noise we see with Japanese candlesticks.

Heikin Ashi Forex Trading Strategy That's Simple To Learn

You can use this script to backtest Heikin-Ashi bar color change strategy. You have to apply this script to usual candles and not Heikin-Ashi!!! Background color indicates HA bar color. On change you'll see green/red arrows and alert will be fired. Also you can find in the code calculations of all HA OHLC values.

Kozlod - Heikin-Ashi Bar Color Change Strategy by ...

Open = [Open (previous bar) + Close (previous bar)]/2. The close of each Heikin Ashi bar equals to the average level between the four parameters - open, close, high, and low: Close = (Open+High+Low+Close)/4. The highest point of a Heikin Ashi candle takes the actual high of the period. This could be the highest shadow, the open, or the close.
