High-Speed Internet, Phone & TV | Frontier.com

Wired networks use Ethernet cable to connect the computers to the network. This makes wired networks less expensive, faster, and more secure than wireless networks. All the computers on a wired network can access the Internet through a single router or gateway, but the requirement for Ethernet connections limit the flexibility of a wired network.

High-Speed Networks TCP/IP and ATM Design Principles ...

For many, high-speed internet with download speeds of 100 Mbps offers the speeds needed for multiple users to engage in a variety of online activities at the same time. Higher speeds, like the 1,000 Mbps max speeds offered with gig internet plans, will give you even more of a speed buffer so you can almost always count on a fast connection.
